HOW TO USE THIS CATALOG AND LOCATE PARTS
MICROFICHE LAYOUT

Each Fiche is 4" x 6" and contains 288 Frames. There are 12 Rows containing 24 Frames in each Row. Each Row is identified by a letter in sequence running vertically from top to bottom. Each Alphabetical Row has 24 Frames running numerically from Left to Right from 1 to 24 inclusive. Therefore, each of the 288 Frames has an Alpha/Numeric Identification. Examples: A4, C20, etc.

The Color coded "Header Strip" of each Fiche identifies the Set (i.e. 1984 - Import), the Fiche Number (i.e. Fiche 1 of 5), the date of issue and the Groups contained within the Fiche.

TO LOCATE PARTS

The Fiche is divided into Part Groups in which illustrations for parts of a similar function and/or location are published. The Group Contents Listing on the next Frame shows the type of parts contained in each Group. An Index to locate each Group is provided between each Text and Illustration Frame throughout the Fiche Catalog.

Several methods may be used to locate a specific part:

- Option 1: From the Group Contents Listing, select the Group which would contain the part to be found. Refer to the adjoining Index to determine where the Group is located and locate the Group. Frame 2, following the Group Header, will contain an index of illustrations. Select the Illustration most likely to contain the part. Refer to the Illustration and review the Illustration most likely to contain the part. Refer to the Illustration and review the Illustration and associated Text Information.
- Option 2: If the "noun" name of the part you seek is known, an Alphabetical Index of Nouns and Illustration Titles, found on the last Fiche of the Set, is provided to assist in finding the part. Several keys may be found in this index.

- Option 3: If the part number is known refer to the Numerical Index on the last Fiche of the set, which will in turn refer you to the Fiche location of the item. Multiple references mean the part is listed more than once.
- Option 4: A complete Index of Illustrations is included on each Fiche and can be referenced in the same manner as the Alpha Index.

VEHICLE IDENTIFICATION NUMBER (VIN) DEFINED

NOTE 1:
The Check Digit will be a numeric character 0-9 or alpha X. It is for verification of the accuracy on the VIN through use of a prescribed mathematical formula mandated by Federal Code MVSS 115.

PAGE NUMBERING

Two part page numbers are used throughout this publication. The first part of the page number identifies the group and the second part of the sequence within the group. For example: 2-3 indicates Group 2, Front Suspension & Drive, Page 3.

In the maintenance of the Loose Leaf Parts Catalog it may be necessary to add information beyond the capacity of the page. If this should occur, and "A" page may be provided; e.g.: 2-3A should be filed immediately following page 2-3.

ILLUSTRATIONS

Two part illustration numbers are used to locate the graphic in its proper sequence. The first part is the group number and the second part the sequence within the group. (Note: illustrations will always be on the left hand page and will be an even numbered page).

A master index of all illustrations follows the INF Section. In addition, each group fly page includes a listing of the graphic illustrations contained within the group.

ALPHABETICAL INDEX

To locate a part by name refer to the Alphabetical Index (located at the back of the catalog with page numbers prefixed "AL"). If the name of the particular item sought is not listed, or is unknown, look for the assembly in which it is contained or to which it is attached. The index refers to the graphic illustration which depicts the part.

NUMERICAL INDEX

To locate a part by number refer to the Numerical Index (located at the back of the catalog with page number prefixed "NU"). This section contains a listing of all part numbers contained in the catalog with reference to their location.

SPECIFYING INFORMATION

The following information is included in this catalog:

1. Part Name
2. Part Number
3. Quantity used per Vehicle
4. Model Application
5. Description and/or dimensions, colors, etc., for proper identification
6. Effective points for changes

SYMBOLS USED IN THIS CATALOG

preceding a part line key number indicates numbers not previously published.

AR indicates the quantity required may vary or is to be determined by the user.

PAR — Indicates (Paint As Required)

() around a part number following the item being specified indicates interchange with the new number for the part. Prior to ordering, check the current Master Parts List for the bracketed number and, if listed, order that number. Doing so will preclude delay in obtaining the part since the new number may not yet be available when the order is submitted.

PRODUCT BULLETINS

Product Bulletins may be issued when important changes are made in production or when changes are to be made in a catalog between issues. It is important that catalogs be updated in accordance with information contained in Product Bulletins to insure accurate specifying.

PARTS CATALOG REVISION SERVICE

Subscribers to the catalog service will be periodically provided with revision copy incorporating the latest information. Revision may be by Page, Group, or by complete book.

Proper interfiling of the revision copy will assure the subscriber of a complete up-to-date catalog.

PART NUMBER PREFIX

Most Part numbers listed in the catalog are eight characters long and consist of two alpha followed by six numeric characters. Always use both alphas when submitting your parts order.

KEY NUMBERS

Parts are listed in the text by the "key number" which identifies the item as depicted in the illustration.

When the "key number" is a combination; i.e.: "2-5," the part number is an assembly consisting of the referenced "key numbers" 2, 3, 4, and 5. If the "key number" appears as 2-5, 9 or 2-5 & 9, the part number contains 2, 3, 4, 5 and 9.

DIMENSIONS

Dimensions listed in this publication are expressed in millimeters. To convert to inches multiply the value shown by .03937. (See Metric Conversion Table)

BODY NUMBER

The Body Number for the Model 24, 41 passenger car is stamped on the right top of the fire wall in the engine compartment. The Body Number for the Model 27 Pick-ups is stamped on the sidewall of the frame near the rear spring hanger.

ENGINE MODEL AND SERIAL NUMBER

The Engine Model is stamped adjacent to the Engine Serial No. on the cylinder block: Q Engine (1500cc is G15B for U.S./4G15 for Canada), K Engine (1600cc is G32B for U.S./4G32 for Canada); A Engine (2000cc is G63B for U.S./4G63 for Canada); F & W Engine (2600cc is G54B for U.S. 4G54 Canada).

The Engine Serial Number is stamped on top of the cylinder block at the right front corner.

TRANSMISSION MODEL and SERIAL NUMBER

Mitsubishi transaxle and manual transmission serial numbers are stamped on the clutch housing. Chrysler built Automatic Transmission Identification numbers are stamped on the left oil pan side rail as follows:

TRANS. ASSY. NUMBER	CHANGE CODE	DATE CODE	SERIAL NUMBER
7 Digits 1234567	1 Digit A (Factory use only of no significance to the field)	4 Digits 8577	4 Digits 0001 (A sequential number for each days' production

This diagram shows an exploded view of a fuel pump assembly. It includes a central pump body with two end fittings. On the left, there is a circular flange (4) connected to a shaft (5) which has a nut (6). On the right, there is a similar assembly with a nut (6), a shaft (5), and a circular flange (4). The central pump body has a threaded section (6) and a flange (5) on its right side.

This exploded view diagram illustrates the assembly of a mechanical component, likely a door latch or handle. The parts are numbered 1 through 38. The diagram shows the following components and their assembly relationships:

- Part 1:** A small cylindrical pin or plug.
- Part 2:** A U-shaped metal bracket or ring.
- Part 3:** A small screw or pin.
- Part 4:** A rectangular metal plate with a handle or lever.
- Part 5:** A small metal bracket or clip.
- Part 6:** A long, curved metal rod or spring.
- Part 7:** A small screw or pin.
- Part 8:** A small cylindrical component, possibly a bush or spacer.
- Part 9:** A small cylindrical component, possibly a bush or spacer.
- Part 10:** A small screw or pin.
- Part 11:** A small screw or pin.

Figure 14-2200

This diagram illustrates the assembly of a mechanical component, likely a pump or engine part, shown in an exploded view. The central component is a complex housing or block with various ports and mounting points. Surrounding it are numerous sub-components and fasteners, each labeled with a number from 1 to 43. The assembly includes:

- Fasteners:** Screws (e.g., 1, 2, 3, 4, 17, 18, 19, 20, 21, 27, 28, 31, 32, 33, 34, 37, 41, 42, 43), bolts (e.g., 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 22, 23, 24, 25, 26, 29, 30, 35, 36), and a nut (40).
- Structural Components:** A large central housing (1), a side plate (5), a top cover (6), a base plate (7), a rear plate (8), a side plate (9), a front plate (10), a side plate (11), a base plate (12), a side plate (13), a front plate (14), a side plate (15), a rear plate (16), a side plate (17), a base plate (18), a side plate (19), a front plate (20), a side plate (21), a rear plate (22), a side plate (23), a front plate (24), a side plate (25), a rear plate (26), a side plate (27), a front plate (28), a side plate (29), a rear plate (30), a side plate (31), a front plate (32), a side plate (33), a rear plate (34), a side plate (35), a front plate (36), a side plate (37), a rear plate (38), a side plate (39), a front plate (40), a side plate (41), a rear plate (42), and a side plate (43).
- Functional Components:** A pump or motor assembly (11), a valve or actuator (12), a sensor or switch (13), a control unit (14), a connector (15), a cable (16), a plug (17), a switch (18), a button (19), a lever (20), a handle (21), a knob (22), a dial (23), a gauge (24), a meter (25), a display (26), a control panel (27), a keypad (28), a screen (29), a camera (30), a microphone (31), a speaker (32), a light (33), a fan (34), a pump (35), a motor (36), a generator (37), a battery (38), a power source (39), a switch (40), a connector (41), a cable (42), and a plug (43).

 The diagram is a technical illustration used for assembly instructions, showing the relative positions and orientations of all parts.

This diagram shows an exploded view of a cable assembly. The main component is a long, flexible cable with multiple conductors. Various connectors and components are shown in their relative positions for assembly. The numbered callouts are as follows:

- 1: A small circular component, possibly a plug or cap.
- 2: A U-shaped bracket or connector.
- 3: A small cylindrical component, possibly a pin or plug.
- 4: A larger, more complex connector or bracket.
- 5: A small cylindrical component, similar to 3.
- 6: A small rectangular component, possibly a label or marker.
- 7: A long, thin cable or wire extending from the main assembly.
- 8: A small cylindrical component, similar to 3.
- 9: A small cylindrical component, similar to 3.
- 10: A small cylindrical component, similar to 3.
- 11: A small rectangular component, similar to 6.
- 12: A small rectangular component, similar to 6.
- 13: A small cylindrical component, similar to 3.
- 14: A small circular component, similar to 1.

Figure 21M-1100

This diagram illustrates the assembly of a mechanical component, likely a pump or motor, showing the relationship between various parts. The parts are numbered 1 through 54. The assembly sequence is indicated by labels: 'UP TO' (top), 'AFTER' (middle), and 'UP TO' (bottom). The diagram shows the following components and their assembly order:

- Top Section (UP TO):** Includes parts 1, 2, 3, 4, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54.
- Middle Section (AFTER):** Includes parts 1, 2, 3, 4, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54.
- Bottom Section (UP TO):** Includes parts 1, 2, 3, 4, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45, 46, 47, 48, 49, 50, 51, 52, 53, 54.

Figure 21A-900

An exploded view diagram of a mechanical assembly. The components are numbered 1 through 7. Part 1 is a large, complex housing or base. Part 2 is a small circular washer or spacer. Part 3 is a larger circular washer or spacer. Part 4 is a circular component with internal features, possibly a bearing or a seal. Part 5 consists of three stacked rings or washers. Part 6 is a circular washer or spacer. Part 7 is a circular component, possibly a cap or a cover, with a central hole. The diagram shows the relative positions and assembly sequence of these parts.

A schematic diagram of a multi-plate clutch assembly. It shows a series of nine circular plates arranged in a row. The plates are connected to two shafts, labeled 8 and 11. The shaft labeled 8 is at the top, and the shaft labeled 11 is at the bottom. The plates are numbered 9 through 17. The plates are arranged in an alternating fashion: odd-numbered plates (9, 11, 13, 15, 17) are connected to shaft 8, and even-numbered plates (10, 12, 14, 16) are connected to shaft 11. The plates are shown in a perspective view, with some plates having a flange or hub on one side.

This diagram shows an exploded view of a mechanical assembly. The components are labeled with numbers and letters: 11 (a large cylindrical housing), 12 (a small circular gasket or washer), 13 (a small circular gasket or washer), 14 (a large gear or flange), 15 (a small circular gasket or washer), 16 (a long shaft with a threaded end), 17 (a long shaft with a threaded end), and 17 A (a small circular gasket or washer). The assembly is shown in a disassembled state, with the components arranged in a linear fashion from left to right.
